

Groovy And Grails 3 Day Intensive Workshop

Overview: This 3 day intensive workshop covers both Groovy and Grails in great detail. After a thorough introduction to the technology, students are taken through many advanced aspects of both the Groovy programming language and the Grails web application framework. This workshop is designed to quickly get teams beyond the basics and on to the most powerful aspects of both Groovy and Grails. Students should expect a lot of hands on interactive lab work.

Audience: This workshop is targeted at development teams looking for intensive detailed coverage of both Groovy and Grails. No previous experience with Groovy or Grails is required.

Format: Lecture and reinforcing labs

Duration: 3 days

Groovy	Grails
<ul style="list-style-type: none">• Installing Groovy• Groovy Tools• Syntax• Strings• Classes and Scripts• Java Integration• Collections• Closures• Operator Overloading• Metaprogramming• Builders• DSLs• Ant and Gant• Testing	<ul style="list-style-type: none">• Installing Grails• CRUD Quick Start• GORM• Controllers• Services• GSP Views• View Templates• Sitemesh Layout• Tag Libraries• Ajax• URL Mapping• Testing• Plugins

All of our workshops are led by top level engineers who have a deep understanding of the technology to help maximize the value of the experience for students of all experience levels.
